Objective

Passionate and detail-oriented UX Designer & Developer with a strong technical foundation in HTML, CSS, SQL, Java, and Python. Proficient in design tools like Figma and Framer, I specialize in creating intuitive, user-centric digital experiences. With hands-on experience in Shopify and WordPress, I seamlessly integrate design and development to craft engaging web solutions. Skilled in version control using Git, I thrive in collaborative environments. Seeking a challenging role that fosters creativity, innovation, and professional growth while contributing to impactful and user-friendly digital products.

Education

JECRC University (Graduation)	Sept 2021 – Present
B.Tech in Computer Science & Engineering	
St. Edmund’s School (School)	2011
Completed my 12th class from CBSE	

Projects

OrderPulse	Oct. 2024 – Feb. 2025
<ul style="list-style-type: none">Joined OrderPulse as a UX Designer, contributing to the development of a next-gen POS system and restaurant management solution, competing with Petpooja. Played a key role in designing an intuitive and user-friendly experience tailored for restaurant owners and staff.Mapped out user journeys, structured information architecture, and created low-to-high fidelity wireframes to optimize usability.Developed interactive prototypes in Figma, ensuring seamless navigation and smooth user interactions.Designed and built the official OrderPulse website(devsharma.me/orderpulse), ensuring a responsive, engaging, and conversion-driven interface.	
C-Tray	Jan. 2025 – Feb. 2025
<ul style="list-style-type: none">C-Tray is a SaaS platform offering LCA (Life Cycle Assessment), decarbonization solutions, and digital passports to help businesses achieve sustainability goals.Handled complete website development, including design ,Development and Deployment.Designed and developed the SaaS UI, ensuring a seamless and modern user experience.Built a custom CMS to enable efficient content management and updates.Delivered a fully responsive and high-performing digital platform, enhancing usability, scalability, and accessibility.	
JuSpace (jospace.tech)	May. 2023
<ul style="list-style-type: none">Designed the entire website on Figma, providing an accessible platform for college students to download notes, study materials, and previous year questions.Developed the website using HTML, CSS and integrated various APIs.Additionally, the website facilitates student networking and helps them find classes on campus	

Solana : UI Design Bounty (devsharma.me/solana)	Oct. 2022 – Dec. 2022
<ul style="list-style-type: none">I recognized UX flaws and UI design inconsistencies in my capabilities and took action to resolve them. I redesigned the entire page, emphasizing improved interactions and clarity.For the successful completion of this project Blender, Spline, Protopie and Figma were used as major tools.
